

PRESS RELEASE

SYCODE launches fourteen data exchange plug-ins for Pro/ENGINEER Wildfire

Panaji – 27th Jul, 2009 - SYCODE today launched fourteen file import and export plug-ins for Pro/ENGINEER Wildfire.

"SYCODE recently joined the PTC Software Partner Program with the intention of fulfilling the data exchange needs of Pro/ENGINEER Wildfire users", explains Deelip Menezes, Founder and CEO of SYCODE. "These fourteen file import and export plug-ins are the first step in that direction. It is interesting to note that Pro/ENGINEER already has support for some of the file formats that can be imported and exported by these plug-ins. But the SYCODE plug-ins enhance Pro/ENGINEER's capabilities even further. For example, Pro/ENGINEER has the ability to read mesh formats like Stereolithography STL and Wavefront OBJ, but it imports the 3D objects as faceted data which cannot be edited inside Pro/ENGINEER. The STL and OBJ import plug-ins for Pro/ENGINEER imports the 3D objects as solid bodies, which can be edited using Pro/ENGINEER's solid modeling tools."

The fourteen data exchange plug-ins are comprised of eight import and six export plug-ins. The import plug-ins are:

- 1) [3DM Import for Pro/ENGINEER](#) – Rhinoceros 3DM file import plug-in
- 2) [3DS Import for Pro/ENGINEER](#) – 3D Studio 3DS file import plug-in
- 3) [DWG Import for Pro/ENGINEER](#) – AutoCAD DWG file import plug-in
- 4) [DXF Import for Pro/ENGINEER](#) – AutoCAD DXF file import plug-in
- 5) [OBJ Import for Pro/ENGINEER](#) – Wavefront OBJ file import plug-in
- 6) [SKP Import for Pro/ENGINEER](#) – SketchUp SKP file import plug-in
- 7) [STL Import for Pro/ENGINEER](#) – Stereolithography STL file import plug-in
- 8) [VTK Import for Pro/ENGINEER](#) – Visualization Toolkit VTK file import plug-in

The file export plug-ins are:

- 1) [3DM Export for Pro/ENGINEER](#) – Rhinoceros 3DM file export plug-in
- 2) [3DS Export for Pro/ENGINEER](#) – 3D Studio 3DS file export plug-in
- 3) [DWG Export for Pro/ENGINEER](#) – AutoCAD DWG file export plug-in
- 4) [DXF Export for Pro/ENGINEER](#) – AutoCAD DXF file export plug-in
- 5) [SKP Export for Pro/ENGINEER](#) – SketchUp SKP file export plug-in
- 6) [VTK Export for Pro/ENGINEER](#) – Visualization Toolkit VTK file export plug-in

These plug-ins are designed to work with Pro/ENGINEER Wildfire 1.0, 2.0, 3.0, 4.0 and 5.0 Preproduction. All the products are priced at \$195 each and are available as fully functional 10 day/run trials. Each product comes with an installer and detailed documentation in the form of a compiled HTML help file which contains a step-by-step tutorial to get the end user started in the shortest possible time.

About SYCODE

SYCODE develops cutting-edge software solutions for Computer Aided Design (CAD). These solutions are in the form of standalone applications or plug-ins that work inside major CAD systems such as AutoCAD, Autodesk Inventor, Autodesk 3D Studio MAX, Autodesk VIZ, Autodesk Maya, SolidWorks, Solid Edge, SpaceClaim, Rhinoceros, Alibre Design, Bricscad, IntelliCAD, IRONCAD, INOVATE, Acrobat, SketchUp, etc.

SYCODE also designs, develops and implements customized software solutions for companies worldwide. The customized solution may be a standalone application working closely with the client's existing CAD application or a plug-in to the CAD application.
