

PRESS RELEASE

SYCODE Releases Eleven Data Exchange Add-ins for ARES

PANAJI, Goa (30th August 2010) – SYCODE has released six file import and five file export add-ins for ARES, the brand new CAD platform from Graebert.

"We see tremendous potential for the ARES CAD platform from Graebert," says Deelip Menezes, Founder and CEO of SYCODE. "That's the reason why we took the initiative of studying the internal working of this new robust platform. We appreciate the assistance and support received from Graebert while developing the data exchange add-ins that we have released today. We are continuing the cooperation with ARES versions for Mac and Linux. In that regard we have already started the enormous task of making all our code cross platform so that we are able to support ARES on the Mac and Linux as soon as possible."

The ARES add-ins have been tested to work with ARES Commander Edition 2010. All the add-ins are available as fully functional trials. They come with installers and detailed documentation in the form of compiled HTML help files which contain step-by-step tutorials to get end users started in the shortest possible time.

More information about the add-ins and free downloads can be found at the SYCODE web site:

About SYCODE

SYCODE develops cutting-edge software solutions for Computer Aided Design (CAD). These solutions are in the form of standalone applications or plug-ins that work inside major CAD systems such as AutoCAD, Autodesk Inventor, Autodesk 3D Studio MAX, Autodesk VIZ, Autodesk Maya, Pro/ENGINEER, SolidWorks, Solid Edge, SpaceClaim, Rhinoceros, KeyCreator, Alibre Design, ARES, Bricscad, IntelliCAD, IRONCAD, INOVATE, Acrobat, SketchUp, etc.

SYCODE also designs, develops and implements customized software solutions for companies worldwide. The customized solution may be a standalone application working closely with the client's existing CAD application or a plug-in to the CAD application.
